Portland, OR 97204

Re: Goodnoe II Wind Project – EOZ2008-05 / SEP2008-31

Dear Mr. Luneke and Mr. Gagliano:

The Klickitat County Planning Department is in receipt of the above referenced EOZ application and expanded SEPA checklist.

Several factors as outlined in WAC 197-11-330 were considered in the threshold determination process, and a DS (Determination of Significance) has been issued. An EIS (Environmental Impact Statement) must be prepared.

Per the authority granted to me under the EOZ ordinance I hereby waive all requirements for the submittal of individual studies at the time of application. It is understood that site specific studies for impacts to habitat/wildlife impacts (including avian impacts), cultural resources impacts and other applicable studies shall be attached to the EIS. The Planning Department will select the consultant firm to prepare the cumulative avian impact assessment and will coordinate preparation of the EIS with you.

A grading and stormwater management plan complying with the best management practices stormwater quality standards shall be submitted at the time project proponent applies for the construction stormwater general permit with Washington State Department of Ecology.

Based on the above, I deem the application as complete. This determination does not preclude the County from requesting additional information during its review process.

Sincerely,

A handwritten signature in cursive script, appearing to read "Curt Dreyer".

Curt Dreyer  
Planning Director  
SEPA Responsible Official
