Re: Energy Overlay "EOZ" Application
Lund Hill Wind Project – EOZ2010-02

Dear Mr. Walsh:

The Klickitat County Planning Department is in receipt of the above referenced EOZ application.

Iberdrola Renewables, Inc elected to prepare an Environmental Impact Statement (EIS) for this proposal. A community meeting will be held in the near future to inform the public on the specifics of the Project. Please keep the Department apprised of the meeting schedule.

Per the authority granted to me under the EOZ ordinance I hereby waive all requirements for the submittal of individual studies at the time of application. It is understood that site specific studies for impacts to habitat/wildlife impacts (including avian impacts), cultural resources impacts and other applicable studies shall be attached to the EIS. A grading and stormwater management plan complying with the best management practices stormwater quality standards shall be submitted at the time project proponent applies for the construction stormwater general permit with Washington State Department of Ecology.

Based on the above, I deem the application as complete. This determination does not preclude the County from requesting additional information during its review process.

Sincerely,

A handwritten signature in cursive script, appearing to read "Curt Dreyer".

Curt Dreyer
Planning Director
