RE: Layout Revision to the southwest portion of the permitted Miller Ranch Wind Energy Project (EOZ2008-01)

To Whom It May Concern:

This is to notify you that Northwest Wind Partners (NWP), a wholly owned subsidiary of enXco Development Corporation, submitted a layout modification request to revise the project layout for the southwest portion of the permitted Miller Ranch Wind Project. The request generally entails three aspects:

1. To relocate some project components, including turbine locations and internal project roads
2. The installation of a 3-mile-long overhead electrical collector line and
3. Addition of a Wood Gulch access crossing.

Klickitat County Code 19.39:5 allows for minor revisions to EOZ permit text or project area. The Planning Department may approve revisions which are within the scope of previous environmental review, are generally consistent with permit conditions, and do not constitute a major deviation from the approved EOZ permit.

A copy of the request is enclosed for your information. Supporting documentation is available upon request at the Planning Department. An administrative decision will be made on or after **December 22, 2010**.

Thank you for your attention to this matter. If questions arise, please contact this office.

Sincerely,

Curt Dreyer
Planning Director
