MASTER PROGRAM ELEMENTS GOALS, OBJECTIVES AND POLICIES

- ECONOMIC DEVELOPMENT ELEMENT
- PUBLIC ACCESS ELEMENT
- CIRCULATION ELEMENT
- RECREATION ELEMENT
- HISTORICAL/CULTURAL ELEMENT
- CONSERVATION ELEMENT
- RESIDENTIAL ELEMENT
- SHORELINE USE ELEMENT

INTRODUCTION

Klickitat County enjoys an outstanding natural setting along the Columbia River, with a wide variety of mountain and plateau rivers and streams. To preserve and enhance these desirable qualities, the county's future development must be carefully planned. In this view, the Shorelines Master Program is directed toward aiding the citizens of Klickitat County in protecting, preserving and restoring their natural amenities, while at the same time, providing for orderly economic development and growth.

The Klickitat County Shoreline Master Plan identifies eight land use elements that are to be managed for in the development of area wide shoreline goals. They include: Economic Development, Public Access, Circulation, Recreation, Historical/Cultural Preservation, Conservation, Residential Development and Shoreline Use. These shoreline elements are the foundation and framework on which the balance of the Master Program has been developed.
