

Well Houses

- Well houses, larger than 200 s.f., require a building permit. A plumbing permit is required for all well houses.
- If the well house is to be heated, it shall be insulated to state energy code requirements.
- Faucets shall be frost free and have an approved backflow prevention device.
- Minimum frost cover of 12” for footings will be accepted for well houses 400 s.f. and smaller.
- Well houses shall be completed, inspected, and installation of frost free faucets and backflow prevention devices verified, prior to use being authorized.
